Technical Documentation:

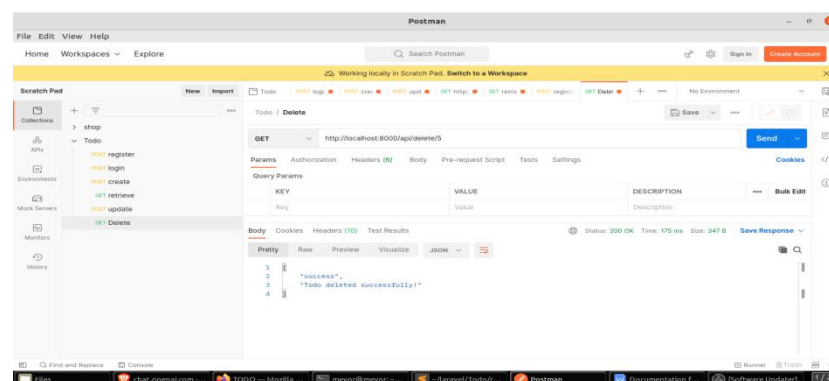

Database Configuration :From env file,
DB_DATABASE=Todo
DB_USERNAME=root
DB_PASSWORD=""

Routes: consist of web and api which I used
Web hold the routes for user interface
Api holds the routes for the api
Resource: fold holds all the blade views for the user interface
App/Http/Controller: holds the controllers for both web and the api.

API DOCUMENTATION:

I actually used postman for testing .

| # | Page | Url | Method |
|---|---------------|---|--------|
| 1 | User register | http://127.0.0.1:8000/api/register?email=mmoso@admin.com&password=12345678&name=pop | Post |
| 2 | Login | http://127.0.0.1:8000/api/register?email=admin@admin.com&password=12345678 | Post |
| 3 | Create todo | http://127.0.0.1:8000/api/store?user_id=1&title=meyor&description=dari dammmmm | Post |
| 4 | Retrieve todo | http://localhost:8000/api/show/1 | Get |
| 5 | Update todo | http://127.0.0.1:8000/api/update/1?title=meyor&description=dari dammmmm | Post |
| 5 | Delete Todo | http://localhost:8000/api/delete/1 | Get |
| 6 | Retrieve all | http://localhost:8000/api/index | Get |

Postman api testing
